

Remy Hair Extensions

CARE AND MAINTENANCE

Hair extensions are a high maintenance hairdressing service and need special care, your stylist at Kissed Hair and Beauty will recommend products to help care for your new hair.

Here's the best way to look after your new hair extensions.

- Do not shampoo your hair for 48hrs after application **NO WASHING AT ALL**
- Plait your hair each night before bed this avoids knotting
- 1-3 days after application; your scalp may feel a little sore as it adjusts to the new weight of the new hair
- Shampooing your hair; apply a small amount of shampoo and apply to scalp by stroking your scalp don't rub
- Conditioning your hair; apply a small amount of conditioner to the mid lengths and ends by stroking the hair, then apply a small amount to your scalp don't rub
- Combing or brushing your extensions; wet hair, use a wide tooth comb only **NO BRUSH** and start combing your hair from the bottom and work your way up to the extensions **DO NOT COMB OR BRUSH FROM THE ROOTS**
- Only use a brush on dry hair follow the same procedure
- Natural hair fall will happen during the 6 weeks but cannot be removed because of adhesive this will be removed at reapplication

Please advise us of any pre-existing medical conditions such as thyroid, lupus or any other condition that can affect the hair follicle
